

As a socially responsible company, Sardich MC is pleased that the introduced Doors Open Day was widely received by the local population. We express our gratitude to all interested citizens of the city of Valandovo and the village of Kazandol, and to people practicing organic farming in the Municipality of Valandovo who visited the company's office in the village of Pirava on this day, May 3, 2017. We will continue to hold similar meetings for the purpose of objective informing of the public and development of a fruitful cooperation. Since the first day of operations, Sardich MC has been looking after the interests of local residents, and has been considering and taking into account the opinions of stakeholders in its projects.
