

## MEETING WITH THE LOCAL RESIDENTS IN THE VILLAGE OF KAZANDOL

On 16.05.2017, as part of Sardich MC's mission to inform the public about company's activities, some of the members of Sardich MC's team including the Chief Technologist and the Chief Geologist of Kazandol mine made a presentation and an introduction to the Applied Technical and Technological Measures in the Mine and Industrial Complex Kazandol to the local residents of the village of Kazandol, which is the nearest populated area to the Kazandol Mine.

During the presentation, an emphasis was made on the Technical and Techological Measures which have been and will be applied during the operation of the Mine and Industrial Complex, and on the significance of the complex in the development of the populated area and the Municipality.

Furthermore, the members of the expert team cleared the uncertainties and questions posed by some of the residents with regard to the ongoing and future work performed at the Kazandol Mine. The residents attending the presentation expressed concern about many issues regarding the processes and the operation of the mine, and showed satisfaction with the explanations given.

During the presentation, the team distributed informational brochures to the residents and discussed issues related to the operation of the Mine Complex as well as issues affecting the local population.

At the meeting it was emphasized that every Wednesday there will be an open day for meeting with the residents, and that anyone can come and request any information from the expert staff in Sardich MC regarding any matter whatsoever.
